been used in the boating industry for a long time due to their corrosion resistance and durability in marine environments. They are commonly found on boat decks, hatches, and compartments, providing a convenient and secure grip for lifting heavy objects or accessing storage areas.

While specific details about the history of this particular product might be scarce, it is likely that it was developed to meet the demands of boat owners and manufacturers for a reliable and aesthetically pleasing lifting solution that can withstand the harsh conditions of marine environments. The usage of stainless steel ensures longevity and resistance to corrosion, allowing the 316 Stainless Steel Square Flush Lift Ring 48*38MM to endure saltwater exposure and extreme weather conditions commonly encountered on boats.

Overall, the 316 Stainless Steel Square Flush Lift Ring 48*38MM with the dimensions 48*38mm is part of a broader category of hardware designed for marine purposes, which have evolved and improved over time to meet the specific needs and challenges of the boating industry.

Product Details

The 316 Stainless Steel Square Flush Lift Ring 48*38MM has the following characteristics:

Material: It is made of high-quality stainless steel with excellent corrosion resistance and durability. Stainless steel is known for its sturdiness and is suitable for both indoor and outdoor applications.

Square Flush Design: The flush design ensures a clean, stylish look when installed. It lies evenly with the surface, eliminating any protrusions or obstructions.

Lift Ring: This 316 Stainless Steel Square Flush Lift Ring 48*38MM allows for easy lifting and maneuvering. It provides users with a comfortable and safe holding experience.

Size: The size of 48*38mm makes it suitable for a variety of applications, such as cabinets, drawers, doors or other equipment that need to be lifted or pulled.

EASY TO INSTALL: Lifting rings are designed for hassle-free installation. It usually requires simple installation or screwing into place.
